

“Customer service like this is hard to find. The company is reliable. We will never go anywhere else.”

JOHN, MAPLE RIDGE BC

Plumbers

24-hour on-call dispatching and services to help you get the job done right, and on time!

Advantage Specialties (AWS) Inc has been servicing the plumbing and drainage industry since 1990.

With our fleet of 8 modern vacuum trucks we provide reliable effective services to those in the plumbing and drainage industry.

Parkade access to 6'3" with low profile vacuum trucks.

Understanding the needs of our customers keeps us on the top of the list for many local companies that need prompt reliable and professional vacuum truck services.

EASILY ACCESS UNDERGROUND PARKADES

All of our trucks are equipped with truck mounted pressure washers and line jetting equipment to meet every need of our customers. We have recently added our first low profile vacuum truck into our fleet. Truck “41” is capable of getting down to 6'2" to get into almost any underground parkade. It can carry 750 gallons or 3300 litres of catch basin waste , septic or grease and has high pressure water and line jetting equipment to complete any job. Our truck differs from our competitors in several ways, most notably in its ability to carry heavier loads and have greater performance in both vacuum and pressure washing/line jetting.

GREATER VACUUM AND PRESSURE WASHING

With our blower powered vacuum trucks we can remove materials from depths greater than 50'. Flooded basements or deep pump stations with high levels of sludge can be removed expeditiously. And when large quantities of material have to be moved we have the equipment and experience to get the job done.

Hydro excavating or “daylighting” underground services is a safe and efficient way to access broken services or uncover root impacted drains. Advantage can uncover in minutes what may take hours for labourers to dig by hand.

Whether servicing a small grease trap or pumping thousands of gallons from a flooded parking garage Our commitment to our customers is simple: Service. We understand the frustrations of no shows, late arrivals and promises unmet.

Try Advantage today and experience our service.

About Advantage Waste

Advantage Waste Specialties Inc. (AWS) is an environmental service company offering affordable waste management solutions including hydro excavating, grease trap services, vacuum truck services, tank cleaning, underground storage tank decommissioning, oil contaminated soil removal and roll off truck services.

We have been proudly serving the lower mainland since 1990 and our extensive expertise in the field has earned us a reputation for quality service and competitive pricing. Our highly trained staff works effectively as a team to minimize job-related risks and provide efficient service.

TAKING CARE OF OUR CUSTOMERS

Taking care of our customers and employee safety are of the utmost importance. Our mission is to educate our employees on the hazards they face each day in our industry in order to protect them and our customers on the job.

Our employees are trained in the following areas:

- **Petroleum Orientated Safety Training (P.O.S.T)**
- **Confined Space Training**
- **Transport of Dangerous Goods (TDG)**
- **WHMIS**
- **Duty specific on the job training.**

AWS keeps personnel available 24hrs a day to manage customer and employee operational concerns.

FAST, ON DEMAND SERVICE

Our Burnaby office is centrally located and ideal for fast, on-demand, 24/7 emergency services for our valued clients. We operate a fleet of roll off and vacuum trucks, with the ability to access underground parking lots.

INSURANCE AND ENVIRONMENT

We carry both environmental impairment and comprehensive liability insurance and W.S.B.C. coverage. We have an A+ rating with the Better Business Bureau and are members of the B.C.A.O.M.A. (British Columbia Apartment Owners and Managers Association). We are also licensed by The Ministry of Environment to transport hazardous waste material.

AWS uses only approved facilities as a means of disposal for materials we transport for our customers. Preference is given to those facilities that maximize the potential benefits of those materials by means of reusing, recycling and composting when possible, in accordance with applicable regulations.

We look forward to finding solutions to your waste disposal and transportation needs.
